

The Peoples' Companion to the Bible

“Following the success of *The Peoples' Bible*, this *Companion* textbook enables students to learn how social location contributes to scriptural interpretation. With sixty contributors writing on all the books of the Bible from Native-American, African-American, Latino/a, Asian-American and Euro-American cultural perspectives, this collection is a primer on the cultural gumbo in which the texts originally were written and to which they will speak in the mid-twenty-first century, when more than 50% of the U.S. population will be of non-European descent.”
